COLLECTION 2023

**INTRODUCTION**

Welcome to our new format downloads which are aimed to provide focused and inspirational information on each main brand and functional areas such as Afternoon Tea etc.

Please visit our website regularly to explore the series of downloads as we build them.

Each download will provide inspirational food images, the range of products for each brand and functional area, along with information on whether we carry an item as **Core Stock** (which means we will usually have a good level in stock at all times). **Core Stock** items will be identified by a ● alongside each item.

If items are identified as a **Special Order** with a □ then, even for samples, we will need to place an order with the supplier. This usually applies to hand-made products or where items are available in a range of glazes.

We hope you will find our new way of providing 'catalogue' information more useful and will help provide some inspiration to enable you to make the best choice.

We are always available to provide you with in-person help, via our friendly Customer Services team or at our London Showroom.

**FIGGJO**

Figgjo is amazingly still a family-owned business, producing in a rural area near Stavanger which is rich in natural beauty and also provides a committed and loyal workforce that spans generations who have worked for this same company.

We have long been avid fans of Figgjo, for its integrity in manufacture, it's stunning designs and how it has moved with the times to provide Hospitality products which really suit the market.

From its clean-lined Base range to its trendy Buffet items, we can provide the best bespoke decoration offering; including design through to manufacture on as few as 48 pieces on dinnerware and teaware; to 6 pieces for Buffet items.

Not only is Figgjo a manufacturer who delivers on all levels, their sustainable credentials just keep getting better.

COLLECTION 2023

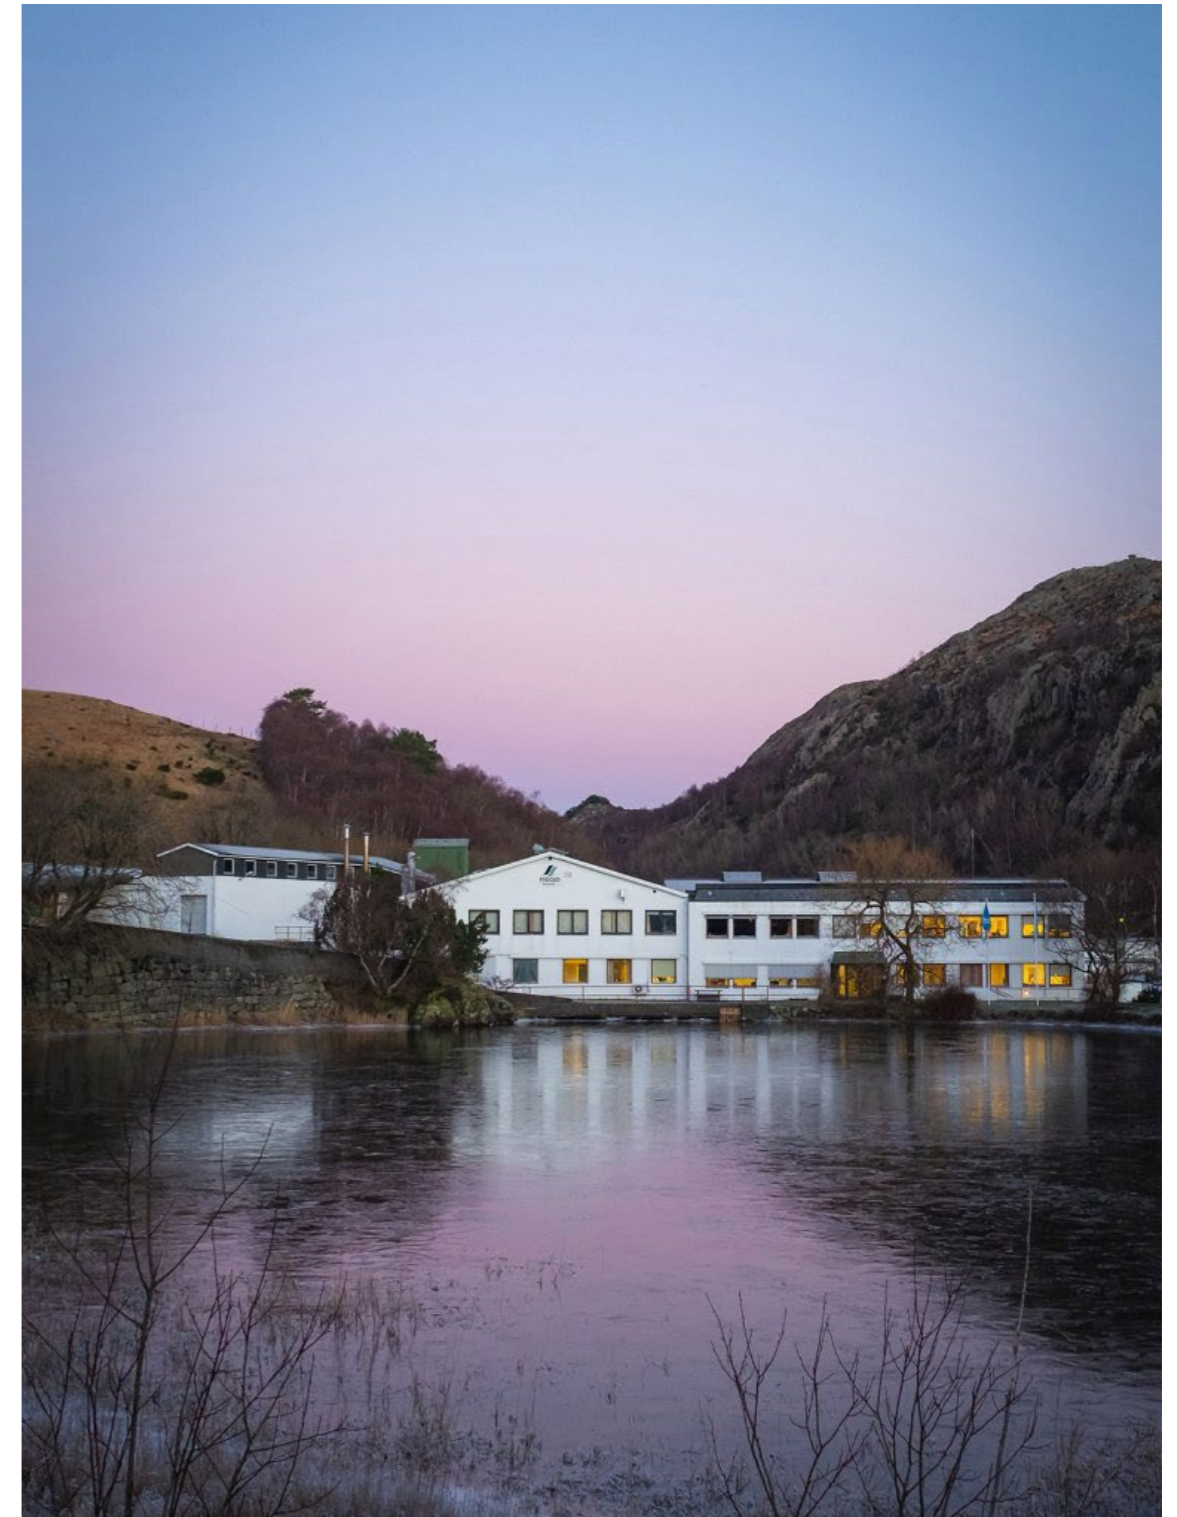

**SUSTAINABILITY**

For a number of years, G & G has been seeking out manufacturers, producers and studios who actually make an effort to reduce their impact on the environment. But more than this; we want them to share the values that we have in terms of business ethics.

Their MD says "We recently installed 994 solar panels on the factory roof, with an annual production of 397.6 kWp. This will reduce our CO2 emissions with 167,926 kg per year. We also found a way to use the excess heat from the production to heat up the offices in the administration building, so we don't have to use any extra energy here.

Here are some of their stories;

- Figgjo - An area encompassing mountains, glaciers and deep coastal fjords. The salmon river which runs through the production facility was the beginning of the porcelain factory, known all over the world today. Still family-owned, the original business was started in 1941 and has employed generations from the same families in the locality.
- All Figgjo products are 100% environmentally friendly, contain no environmental harmful materials and do not need to be sorted or disposed as hazardous waste.
- Figgjos porcelain is tested for lead, cadmium and barium release in accordance with the laws and regulations in the EU and Norway. Our products contain no substances hazardous to health or the environment. This applies to both glaze and colours.
- Process water is cleaned according to public requirements and is being analysed 6 times per year under public supervision. Figgjo has zero emission to the external environment.
- Dust and flushing water from the glaze compartment is cleaned and the glaze is recycled back to production again.
- Production uses natural raw materials, and they recycle production mass throughout the process. Fired products which do not comply with our quality requirements are down-cycled as a filler for construction work, road construction etc.
